

CATV and Telephone Enclosure

PWD6 Multi PURPOSE in-Wall Housing

This multi port in wall housing is designed to ensure the structural integrity of building envelopes. Its innovative design directs moisture away from building facades and the underlying structural framework.

The PWD6S features dual drip ledges, a mounting splashboard, grounding post, top and rear body knockouts and a base entry port, which will accommodate a maximum of

2" PVC conduit. Additional future wiring can be accommodated through the front bottom grommet, without compromising the water penetration protection.

Standard color is grey.

Inside dimensions:

PWD6F + PWD6S: H: 7.7" x W: 5.9" x D: 4.75"

PWDSFL: H: 13" x W: 8" x D: 5.6"

Telus and C.S.A. approved.
