### Features

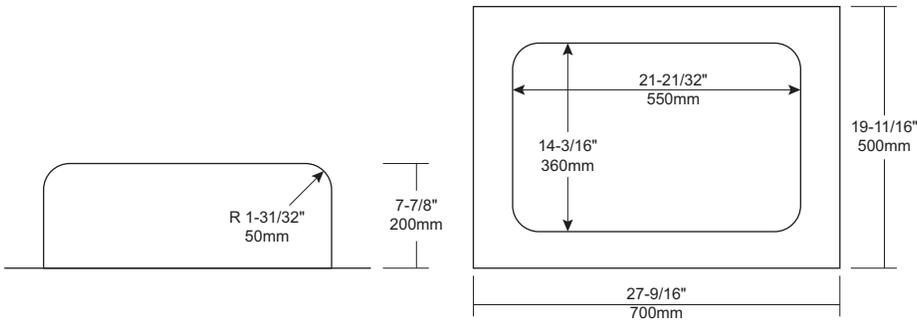

#### General Features

The body is constructed from a membrane with flat flange all around to better enclose fixture from insulation. Rated max. 90°C, polyethylene material. Required to be installed in order to comply with specific provincial regulations in terms of air leakage.

#### Description

The vapour barrier extender is for use with Liteline recessed IC rated fixtures to prevent air leakage from entering into the attic. Suitable for ceilings and damp locations.

**Notes:** For additional options please consult your Liteline representative. Due to our continued efforts to improve our products, product specifications are subject to change without notice.
