

Residential Floor Boxes for Wood & Concrete Floors

862 Series Residential Floor Boxes provide an excellent solution for the low density power or communication requirements in open space areas. Durable PVC construction and an innovative design allows the 862 Series Residential Floor Boxes to be installed in either wood or slab-on-grade concrete floors.

862 Series Floor Boxes are designed to work with a full range of forged, solid brass or brushed aluminum covers to accommodate a wide range of power and communication devices.

862C Residential Floor Boxes provide access to power and communication in residential spaces.

Features & Benefits

- **Durable PVC construction.** Allows for use in both wood floors and slab-on-grade concrete floors. For concrete floor installations, use the available add-on conversion kit which provides mud cap and conduit hubs.
- **Complete assemblies.** A variety of assemblies are available for specific applications for fast and easy installations. Each assembly includes the box, receptacle, cover assembly, and hardware.
- **Wide selection of covers.** Forged solid brass and brushed aluminum covers accommodate a full range of power and communication devices and are available for both tile and carpet applications. Covers are included with assemblies or are available separately to provide installation and changeout flexibility.
- **TopGuard protection.** An integral design which keeps out water, dirt, and debris from the power or communication compartments. Meets and exceeds the new UL scrub water exclusion requirements.
- **Datacom connectivity options.** Accepts industry standard and proprietary devices from a wide range of manufacturers to provide a seamless and aesthetically pleasing interface for voice, data, audio, and video applications at the point of use. A wide selection of data and bezel options are available for use with Ortonics® TracJack™ and Series II devices.

862 Series Floor Boxes can be ordered as kits that include floor box, receptacle, and cover assembly.
