TOOL CENTER BAG

Average customer product rating:

The hilmor Tool Center Bag is your total tool storage solution. It includes 24 exterior and interior pockets and three pouches so you can store your tools safely and find them quickly. Two padded, side pockets provide safe storage for your meter. Its sturdy, hard plastic, water-resistant bottom means rain or shine, the contents inside won't be damaged. Plus, the padded aluminum carrying handle with comfy grip means it's built to last and easy to carry around. And while it's spacious enough to hold up to 50 lbs., a padded shoulder strap makes carrying it a little more comfortable.

I wouldn't recommend this bag, the center portion which separates sides is held by velcro and doesn't stay in place. Tools fall over making it very disorganized.

 **Recommends This Product**

I like to keep tools separated by function, ie., I have a bag for copper tooling and wiring, larger bag for cordless tools, general install bag, etc. I was initially put off by the odd flap design on the top of this bag but came to love it after dragging it under a few crawl spaces. This has become my go-to for service calls, I can fit two 12v drills/drivers along with a myriad of hand tools and diagnostic meters. The pockets on either side are well designed such that even when I'm dragging the bag along every screwdriver stays put. The sides can be zippered but the velcro hold on the top flap is strong enough to keep it closed and prevent any losses. I stopped keeping track of how many tools I've lost in a sandy or dirt crawl, at times without noticing that something has fallen out of my bag. I'm impressed by the material and composition of the tool center bag, it has held up wonderfully and the bottom is especially easy to clean after a dirty job. It is large enough to carry a wide variety of tools that suite 90% of my service calls but not too cumbersome to drag in a crawl or tote into an attic. This has become my go-to bag when I step off the truck.
