Features

Body Construction

The body is constructed from machined aluminum which acts as a heat sink for the 1.2W LED. Fixture can be rotated 360° to a fixed position for directional asymmetrical lighting. Provided with toolless push in connector allows for daisy chain option, to be used with 18-2 AWG LVT cable (not provided). Suitable for indoor use only, dry and damp locations.

Housing

The LED asymmetric wall light is installed in an aluminum housing which allow for enclosed wiring and the fixture to be installed where insulation is present. Housing includes a strain relief to secure electrical cables and two torsion clips for enhanced rigidity to recessed surface.

Power Consumption

This fixture operate on 24V constant voltage. Remote power supply required (See back for driver options).

Voltage Drop

Contact your Liteline representative for voltage drop calculation guidelines.

Light Output

This recessed light outputs a warm white (3000 K) colour temperature which provides 59 lumens.

Beam Spread

The fixture LED provides lighting with 45 degree beam spread.

Dimming

100%-5% dimming with compatible electronic and magnetic dimming

Installation

When installing WLFDR-1W in an insulated wall a vapour barrier (WL-VBE sold separately) and a pre-mounting plate (P-1750 sold separately) are required.

Applications

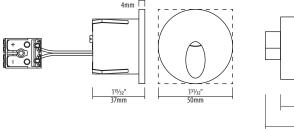

With the added directional control, this allows for multiple corridor/hallway sidewall recess lighting, in addition adding essential accent illumination for under cabinet, display and wall washing environments.
